1 Introduction

1.1 The American Community Survey

The American Community Survey (ACS) is a household survey conducted by the U.S. Census Bureau with an annual sample size of about 3 million addresses. The ACS data provides communities with the current information they need to plan investments and services. Information from the survey generates data that help determine how more than $400 billion in federal and state funds are distributed annually. Each year the survey produces data that cover the periods of 1-year, 3-year, and 5-year estimates for geographic areas in the United States and Puerto Rico, ranging from neighborhoods to Congressional districts to the entire nation. For more, information about the ACS, please visit our home page, www.census.gov/acs.

Most ACS tables are published on the Census Bureau's American FactFinder (AFF) website, factfinder.census.gov, and are available for download in several forms. However, for the 2005-2009 ACS 5-year data release, 295 Detailed Tables and tables for census block groups are not published on American FactFinder. These tables can only be accessed by using the ACS Summary File. This document will brief data users on the contents of the ACS Summary File and explain how they can use it to obtain the 5-year estimates.

1.2 The American Community Survey Summary File

The American Community Survey Summary File (ACSSF) is a unique data product that includes all the estimates and margins of error from the Detailed Tables and geographies that are published for the ACS. Other ACS data products such as Subject Tables and Data Profiles are created from the Detailed Tables and are therefore not available in the Summary File.

Since the Detailed Tables contain over 18 billion cells, the tables are stored in a series of files with only the data from the tables, without such information as the title of the tables, the description of the rows, and the names of the geographic areas. That information is in other files that the user must merge with the data files to reproduce the tables.

The ACS Summary File data files are in American Standard Code for Information Interchange (ASCII) format. The files are divided into three types:

- Geographies – (position based)
- Estimates – (comma delimited)
- Margins of Error – (comma delimited)

Chapter 2 discusses each component in detail and explains how to put them all together.

1.3   Topics and Geographies Covered

Data contained in the ACS Summary File cover demographic, social, economic, and housing subject areas. All Detailed Tables for the ACS 5-year estimates are in the Summary File and are listed in Appendix E. This appendix also shows whether a table is available for download on American FactFinder.

The published ACS Summary File geographies cover areas that are based on "summary levels". A summary level specifies the content and the hierarchical relationships of the geographic elements that are required to tabulate and summarize data. For example, summary level code "040" represents the U.S. States, Washington D.C., and Puerto Rico; while summary level code "050" represents counties and county equivalents within states. Many resources are available to help users understand the ACS geographic terms and concepts. For additional information, please visit www.census.gov/geo/www/reference.html.

In addition to the ACS 1-year and 3-year summary levels, new summary levels are added to the 5-year data with expanded geographies including census tracts and block groups, and additional information for geographies such as American Indian areas, core based statistical areas, combined statistical areas, Congressional districts and state legislative districts. See the full list of summary levels published for the 5-year Detailed Tables in Appendix F. For the 2005-2009 ACS 5-year data release, data for census block groups are not published on American FactFinder and are only available using the ACS Summary File. The list of tables in Appendix E shows which tables are available at the block group level.

There are 295 Detailed Tables that are not available on American FactFinder, which are documented in Appendix E. All Detailed Tables, including those 295 tables, are available for download in comma-delimited format, which can be easily read into a spreadsheet, at www2.census.gov/acs2009_5yr/prod. The Data Profiles and Subject Tables are also available on this site.

1.4   Tools for Obtaining Data

Since using the ACS Summary File can be challenging, users should first check if their tables of interest are available for download on American FactFinder. (Up to 7,000 tables can be downloaded at one time using the American FactFinder Download Center.) Below are some other options to help users retrieve the tables they want. They are listed in order based on ease of use.

- Summary File Excel Retrieval Tool

  The Summary File Excel Retrieval Tool is a macro-driven Excel spreadsheet that provides a method to easily retrieve a table for the nation, states, and all of the geographic areas in a state (or for all cross-state geographic areas such as metropolitan statistical areas or census regions). This tool is designed to be easy to use, and does not require any programming experience. There is a drop down menu from which the user can select the state for the table and receive data for all geographies within the state. One key

requirement is that Microsoft Excel 2007 or later is needed. Other hardware and software requirements for the tool are listed in Chapter 3.1. For more information about the application, see the ACS Summary File page at www.census.gov/acs/www/data_documentation/summary_file/.

- Summary File DataFerrett Tool (coming in January 2011)

  DataFerrett is a tool provided by the Census Bureau to help users view, download, and manipulate a wide variety of data sets to suit their needs. Among the features provided by this tool is the ability to construct user-defined variables from the variables on the input data file(s), the ability for users to exclude data that is not of interest, a variety of options for downloading data, and the ability to create complex tabular reports from the data including graphs and thematic maps. The initial release of the 2005-2009 ACS Summary File data in DataFerrett, currently planned for January 2011, will focus primarily on the display and download capabilities of DataFerrett. This tool will be ideal for data users who wish to view, customize, and restrict the data that is downloaded from the 2005-2009 ACS Summary File. Detailed information about DataFerrett is not available in this document and will be available when the tool is released.

- Summary File Excel Import Tool

  The Summary File Excel Import Tool is a replicate of the Excel templates that Census 2000 provided for the SF3 summary file release. The Excel Import Tool provides a basic layout of each sequence in Excel in the same format as the estimate and margin of error files are formatted. For individuals that do not have Excel 2007 or later and are unable to use the Excel Retrieval Tool, the Excel Import Tool provides an alternative option to read the summary file into Excel. For more information on this tool, see Chapter 3.3.

- SAS Programs

  There are two programming options for SAS users. The first option is a set of individual SAS programs, one for each summary file by geography and sequence. These programs are best for users only interested in looking at a specific sequence for a specific geography. The second option is a single SAS program that is parameterized to allow users to read in any sequence for any geography into SAS. This program can also be used to read the entire summary file into SAS, and is designed for users looking for a large amount of data. For more information on these programs, see Chapter 3.1.

1.5 Notable Changes to the Summary File

For those who have previously used the ACS Summary File, the files for the 5-year estimates are basically the same with the following exceptions:

- Geography Levels are Published Only on the Summary File

  Census block group level data are available only from the Summary File and they are not available for download on American FactFinder. User tools that are available are covered in Chapter 3.

- The "merge_5_6" File Has Been Renamed

  The merge_5_6 file that links the tables to the sequence files they are in is now called the Sequence Number and Table Number Lookup file, a name that more accurately describes the purpose and contents of this file. Note that the sequence numbers are different for the 2005-2009 ACS 5-year Summary File than for other summary products including the 2009 ACS 1-year Summary File.

- Folders Have Been Renamed

  The names of the folders on the website that hold the zip files have been modified to better describe their contents. These have been renamed in an effort to deter novice users from inadvertently downloading the entire contents of the 2005-2009 ACS Summary File, which can take from 1 to 10 hours, depending on the speed of the Internet connection. (More information about download times can be found in Chapter 2.2.)

Folder Name for the 2009 1-Year Summary File	Folder Name for the 2005-2009 5-Year Summary File
Entire_SF	2005-2009 ACSSF_All_In_Two_Giant_Files (Experienced Users Only)
Entire_States	2005-2009_ACSSF_By_State_All_Tables
Seq_by_ST	2005-2009_ACSSF_by_State_by_Sequence_Table_Subset

- Summary File Format Has Been Modified

  For convenience, the files in zip format in each directory are separated further by two types of zipped files: one for census tract and block group data and the other for all the remaining levels of geography. This file type is specified in the file name of each zip file. For more detail, see Chapter 2.2.

1.6 Contact Us

Please send any technical questions or comments on the ACS Summary File you have via email to: acso.users.support@census.gov. If you have questions or comments about the American Community Survey, you can submit a question online at ask.census.gov/.

2   How to Use the ACS Summary File

2.1   Locating the Summary File

There are two methods to easily find the 2005-2009 ACS 5-year Summary File: (1) through the ACS home page at www.census.gov/acs or (2) through the American FactFinder web site at factfinder.census.gov.

1) Through the ACS home page at www.census.gov/acs:

From the American Community Survey home page, www.census.gov/acs, click on the **Data and Documentation** tab, select the option for **Summary File**, as shown below:
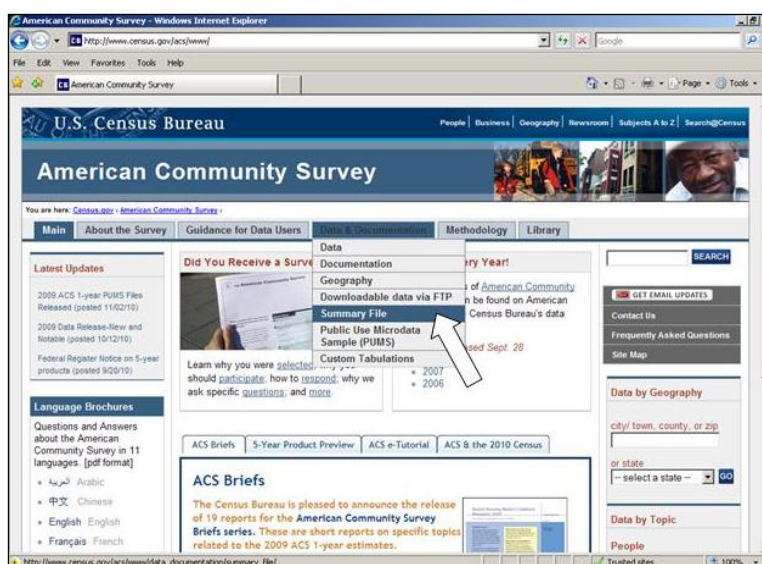

That will take you to the ACS Summary File page. As you can see at the top of the next page, the data are arranged by each ACS data year and estimate type (1-year, 3-year and 5-year). Click on **2005-2009 ACS 5-Year Summary File** to go to the ACS Summary File.
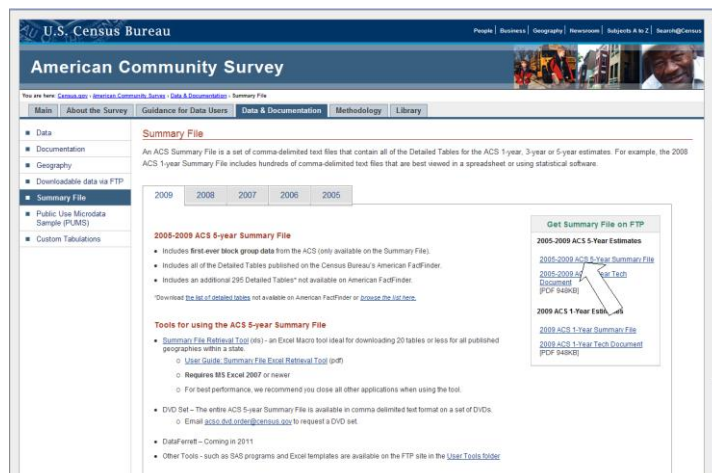

There you will see the following screen:
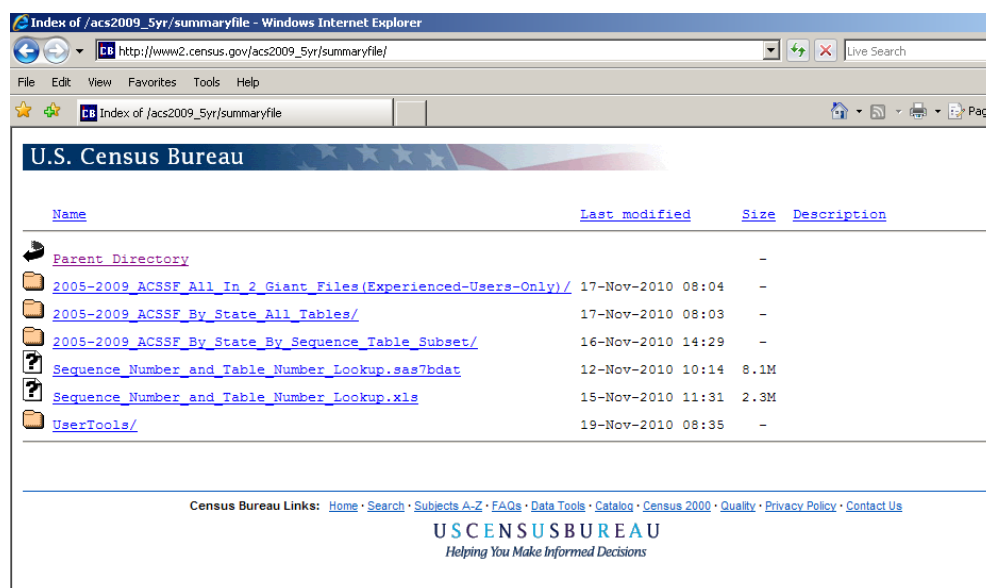

This is the ACS Summary File—it is actually comprised of three folders that are explained the next chapter.

2) Through the American FactFinder web site at factfinder.census.gov:

The Summary File Directory may also be accessed through the American FactFinder at factfinder.census.gov. Under the American Community Survey heading, select **Get Data,** as shown in the screenshot below.

Inside the grey box titled 2005-2009 American Community Survey 5-Year Estimates, click on the **Download 5-Year Block Group Data in Summary Files**, as the screenshot below shows.
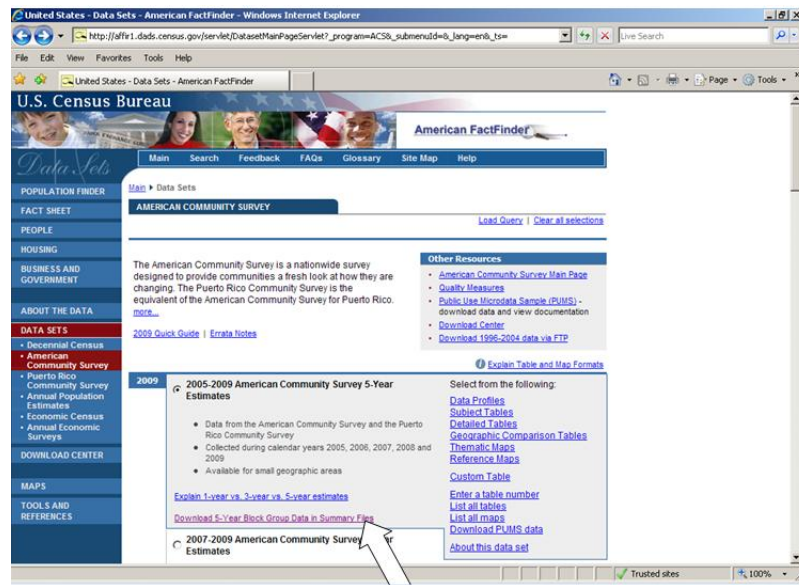

That will lead to the following screen:
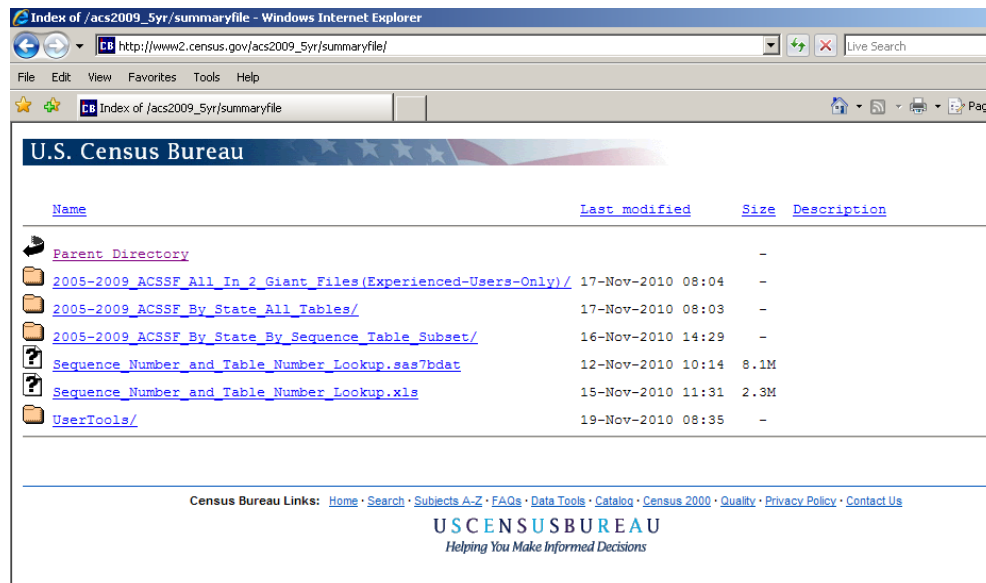

This is the ACS Summary File—it is actually comprised of three folders that are explained the next chapter.

2.2 Summary File Organization

The Summary File is organized in three folders, which are the first three folders shown in the screenshot on the previous page. These three directories contain the same combination of files; they are simply arranged differently to accommodate various user needs:

- 2005-2009_ACSSF_All_In_2_Giant_Files(Experienced Users Only)

  The "All in 2 Giant Files" directory contains two zip files, with one containing the files for all tables at the census tract and block group levels only and the other containing the files for all tables for all geographies except for census tracts and block groups. Each zip file contains geography, estimate, and margin of error files. These are ideal to download if users want estimates and margins of error for all geographies throughout the nation at once. These files are very large and should only be used by those that can easily process very large files. For a graphical representation of this folder and its contents, see Appendix B.1.

- 2005-2009_ACSSF_By_State_All_Tables

  The "By State All Tables" directory contains zip files for each state or state level equivalent--each of the 50 states, District of Columbia, Puerto Rico, as well as cross-state geographies such as metropolitan areas. Each state level file is broken into two zip files with one containing the files for all tables at the census tract and block group levels only and the other containing the files for all tables for all geographies except for census tracts and block groups. Each zip file contains geography, estimate, and margin of error files. Downloading from these state level folders is ideal if users want all the tables for a state level geography or cross-state geographies. For a graphical representation of this folder and its contents, see Appendix B.2.

- 2005-2009_ACSSF_By_State_By_Sequence_Table_Subset

  The "By State By Sequence Table Subset" directory contains folders for each state or state level equivalent--each of the 50 states, District of Columbia, Puerto Rico, as well as cross-state geographies such as metropolitan areas. Each state level folder is broken into two additional folders: one for the census tract and block group levels only and the other for all geographies except for census tracts and block groups. Within those folders are a geography file and zip files containing the estimate and margin of error files, one per "sequence" (sequences are explained in Chapter 2.3). Downloading from these folders is ideal if users only want a few tables for a state level geography or cross-state geographies. For a graphical representation of this folder and its contents, see Appendix B.3.

The naming convention used for the zipped files is the following:

2009 5 ak 0001 000.zip

Reference Year
2009=Last year of the period

Place Holder
000=Reserved for future use

State Level
ak=Alaska

Period Covered
5=5-Year estimates

Sequence Number
0001=Sequence number
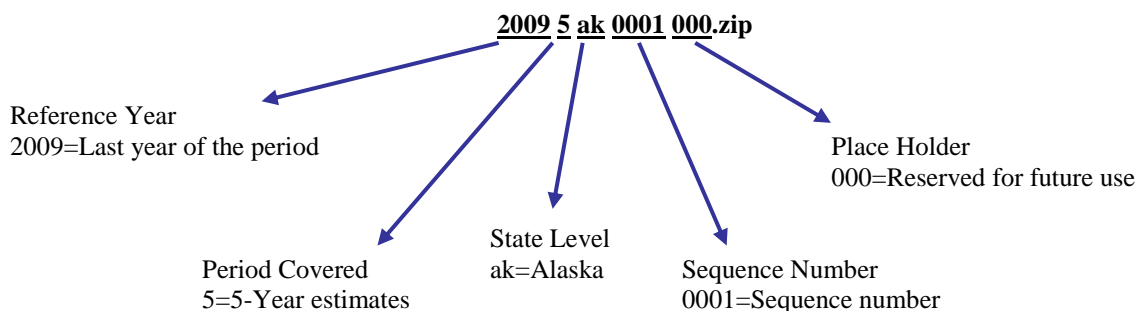

File Name: 20095ak0001000.zip		
Example	**Name**	**Range or Type**
2009	Reference Year	ACS data year (last year of the period for multiyear periods)
5	Period Covered	1=1-year, 3=3-year, 5=5-year
ak	State Level	US or abbreviations for state, District of Columbia, and Puerto Rico
0001	Sequence Number	0001 to 9999
000	Place Holder	Iteration value for future use

As Appendix B shows, the "All in 2 Giant Files" and the "By State All Tables" folders contain the same tables as the "By State By Sequence Table Subset" folder. The difference is in the organization. The "By State All Tables" zipped files contain all of the sequence files for the given state, so each zipped file contains 234 files. The "All in 2 Giant Files" zipped files contain all sequence files for all states, which is about 17,000 files.

It is highly recommended that data users download from the "By State By Sequence Table Subset" folder to decrease download time, especially if (like most users) they need only a few tables for a few geographic areas. The chart below shows the average download time for each directory as a reference, based on download speed and which file is being downloaded:

	Estimated Time to Download One File			
	High-Speed Download		Low-Speed Download	
Folder	All geos except Tracts and Block Groups	Tracts and Block Groups	All geos except Tracts and Block Groups	Tracts and Block Groups
All In 2 Giant Files (Experienced Users Only)	1 hour	38 minutes	10 hours	7 hours
By State All Tables	Up to 5 minutes	Up to 3 minutes	Up to 1 hour	Up to 45 minutes
State by Sequence Table Subset	less than 1 minute	less than 1 minute	less than 1 minute	less than 1 minute

9

As mentioned earlier, the zip files are divided by state or state-level equivalents. Those state-level equivalents include the District of Columbia and Puerto Rico. There is also a level called "United States", which is for summary levels that can cross state boundaries, such as the Nation, and all Regions, Divisions, Metropolitan Statistical Areas and Tribal Reservations. The United States level does not contain tables for geographies that are always entirely within a state, such as counties and places; for those tables, go to the folder or files for that state.

Below is a table that gives examples of the types of summary levels are in the state and state-level equivalent folders and files and those that are in the United States folders and files. It also shows that for the state and state-level equivalents, the census tracts and block groups are in separate folders and files than the other summary levels.

Each State, DC, and Puerto Rico	United States
All_Geographies_Not_Tracts_Block_Groups	**All_Geographies_Not_Tracts_Block_Groups**
State	United States
County	Region
County subdivision	Division
Place	All metropolitan or urban statistical areas
Congressional districts (110th Congress)	New England City and Town Area (NECTA)
Public Use Microdata Area (PUMA)	All American Indian/Alaska Native/Hawaiian Homeland areas
School Districts	Urban areas
Alaska Native Regional Corporation	
Tracts_Block_Groups_Only	
Tracts	
Block Groups	
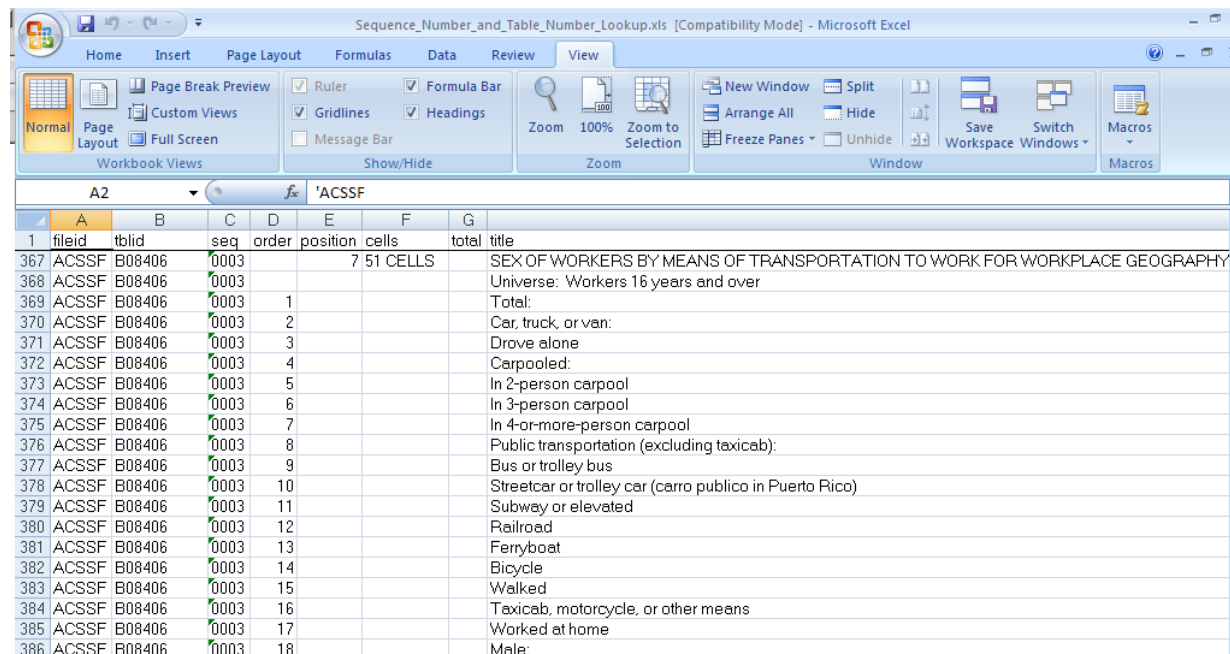

2.3 Sequence Numbers

Detailed Tables for similar subject areas are grouped together in "sequences". A sequence number is an assigned number to a grouping of ACS tables. The rules governing how many tables can be assigned the same sequence number depend on the following:

- There are no more than 256 columns per sequence, so the data can be read into a spreadsheet.
- There are 117 sequences for the 2005-2009 ACS 5-year Summary File.
- Tables are grouped into sequences according to subject area, but they are not in numerical order (i.e., Table B00001 is not in sequence file 0001).
- Tables with race iterations are grouped in the same sequence.

It is critical to know the sequence number associated with a Detailed Table (Table ID) for two reasons. First, one needs it in order to access the correct estimates and margins of error files for his/her desired table. Second, the field start position for the estimates or margins of error of a certain Detailed Table depends on its sequence number. The Sequence Number and Detailed Table Number Lookup file, available as an Excel spreadsheet or SAS Dataset, lists Table IDs associated with each sequence number. This spreadsheet, formerly known as "merge_5_6", is available www2.census.gov/acs2009_5yr/summaryfile/.

For example, to find the sequence number associated with the table B08406, a user must open and look for that Table ID in the Sequence Number and Table Number Lookup file. Shown below is a screenshot of this file opened to where the "tblid" is B08406. The next column in the file, "seq", shows that this Table ID is associated with the sequence number "0003". In order to access the estimate and margin of error file for Table B08406, a user will need to download the estimate and margin of error files labeled with the sequence number "0003".

	A	B	C	D	E	F	G	
1	fileid	tblid	seq	order	position	cells	total	title
367	ACSSF	B08406	0003		7	51 CELLS		SEX OF WORKERS BY MEANS OF TRANSPORTATION TO WORK FOR WORKPLACE GEOGRAPHY
368	ACSSF	B08406	0003					Universe: Workers 16 years and over
369	ACSSF	B08406	0003	1				Total:
370	ACSSF	B08406	0003	2				Car, truck, or van:
371	ACSSF	B08406	0003	3				Drove alone
372	ACSSF	B08406	0003	4				Carpooled:
373	ACSSF	B08406	0003	5				In 2-person carpool
374	ACSSF	B08406	0003	6				In 3-person carpool
375	ACSSF	B08406	0003	7				In 4-or-more-person carpool
376	ACSSF	B08406	0003	8				Public transportation (excluding taxicab):
377	ACSSF	B08406	0003	9				Bus or trolley bus
378	ACSSF	B08406	0003	10				Streetcar or trolley car (carro publico in Puerto Rico)
379	ACSSF	B08406	0003	11				Subway or elevated
380	ACSSF	B08406	0003	12				Railroad
381	ACSSF	B08406	0003	13				Ferryboat
382	ACSSF	B08406	0003	14				Bicycle
383	ACSSF	B08406	0003	15				Walked
384	ACSSF	B08406	0003	16				Taxicab, motorcycle, or other means
385	ACSSF	B08406	0003	17				Worked at home
386	ACSSF	B08406	0003	18				Male:

2.4 Geography File

There is a geography file that comes with the estimate and margin of error files. This file begins with a "g" and is an ASCII file using a position based format. A geography file exists for each state or state level equivalent.

Geography files are named using the following convention:

g 2009 5 ak.txt

File Type
g=geography

Reference Year
2009=Last year of the period

Period Covered
5=5-year data

State Level
ak=Alaska
File Name: g20095ak.txt		
Example	**Name**	**Range or Type**
g	File Type	e=estimate, m=margin of error, g=geography
2009	Reference Year	ACS data year (last year of the period for multiyear periods)
5	Period Covered	1=1-year, 3=3-year, 5=5-year
ak	State Level	US or abbreviations for state, District of Columbia, and Puerto Rico

The geography files contain geographic information for an ACS tabulated area, including the name of the area. One variable on the file, called LOGRECNO, is the logical record number and is used to link the level of geography to the estimate and margin of error files.

The following table provides the layout of the geography file:

Layout of the Geography File

Data Dictionary Reference Name	Description	Field Size	Starting Position	Geographic Summary Levels For Single-Year Tables
RECORD CODES				
FILEID	Always equal to ACS Summary File identification	6	1	All Summary Levels
STUSAB	State Postal Abbreviation	2	7	All Summary Levels
SUMLEVEL	Summary Level	3	9	All Summary Levels
COMPONENT	Geographic Component	2	12	All Summary Levels
LOGRECNO	Logical Record Number	7	14	All Summary Levels
GEOGRAPHIC AREA CODES				
US	US	1	21	010
REGION	Census Region	1	22	020
DIVISION	Census Division	1	23	030
STATECE	State (Census Code)	2	24	**Reserved for future use**

Data Dictionary Reference Name	Description	Field Size	Starting Position	Geographic Summary Levels For Single-Year Tables
STATE	State (FIPS Code)	2	26	040, 050, 060, 067, 070, 080, 140, 150, 155, 160, 170, 172, 230, 260, 269, 270, 280, 283, 286, 290, 311, 312, 313, 315, 316, 320, 321, 322, 323, 324, 331, 333, 336, 338, 340, 341, 345, 346, 351, 352, 353, 354, 356, 357, 358, 360, 361, 362, 363, 364, 365, 366, 500, 510, 550, 610, 612, 620, 622, 795, 950, 960, 970
COUNTY	County of current residence	3	28	050, 060, 067, 070, 080, 140, 150, 155, 270, 313, 316, 322, 324, 353, 354, 357, 358, 362, 363, 365, 366, 510, 612, 622
COUSUB	County Subdivision (FIPS)	5	31	060, 067, 070, 080, 354, 358, 363, 366
PLACE	Place (FIPS Code)	5	36	070, 080, 155, 160, 172, 269, 312, 321, 352, 361
TRACT	Census Tract	6	41	080, 140, 150
BLKGRP	Block Group	1	47	150
CONCIT	Consolidated City	5	48	170, 172
AIANHH	American Indian Area/Alaska Native Area/ Hawaiian Home Land (Census)	4	53	250, 251, 252, 254, 260, 269, 270, 280, 283, 286, 290, 550
AIANHHFP	American Indian Area/Alaska Native Area/ Hawaiian Home Land (FIPS)	5	57	**Reserved for future use**
AIHHTLI	American Indian Trust Land/ Hawaiian Home Land Indicator	1	62	252, 254, 283, 286
AITSCE	American Indian Tribal Subdivision (Census)	3	63	251, 290
AITS	American Indian Tribal Subdivision (FIPS)	5	66	**Reserved for future use**
ANRC	Alaska Native Regional Corporation (FIPS)	5	71	230
CBSA	Metropolitan and Micropolitan Statistical Area	5	76	310, 311, 312, 313, 314, 315, 316, 320, 321, 322, 323, 324, 332, 333, 341
CSA	Combined Statistical Area	3	81	330, 331, 332, 333, 340, 341
METDIV	Metropolitan Statistical Area-Metropolitan Division	5	84	314, 315, 316, 323, 324
MACC	Metropolitan Area Central City	1	89	**Reserved for future use**
MEMI	Metropolitan/Micropolitan Indicator Flag	1	90	010, 020, 030, 040, 314, 315, 316, 323, 324
NECTA	New England City and Town Area	5	91	335, 336, 337, 338, 345, 346, 350, 351, 352, 353, 354, 355, 356, 357, 358, 360, 361, 362, 363, 364, 365, 366
CNECTA	New England City and Town Combined Statistical Area	3	96	335, 336, 337, 338, 345, 346
NECTADIV	New England City and Town Area Division	5	99	355, 356, 357, 358, 364, 365, 366
UA	Urban Area	5	104	400

Data Dictionary Reference Name	Description	Field Size	Starting Position	Geographic Summary Levels For Single-Year Tables
BLANK		5	109	**Reserved for future use**
CDCURR	Current Congressional District ***	2	114	500, 510, 550
SLDU	State Legislative District Upper	3	116	610, 612
SLDL	State Legislative District Lower	3	119	620, 622

BLANK		3	128	**Reserved for future use**
BLANK		5	131	**Reserved for future use**
SUBMCD	Subminor Civil Division (FIPS)	5	136	067
SDELM	State-School District (Elementary)	5	141	950
SDSEC	State-School District (Secondary)	5	146	960
SDUNI	State-School District (Unified)	5	151	970
UR	Urban/Rural	1	156	010, 020, 030, 040
PCI	Principal City Indicator	1	157	010, 020, 030, 040, 312, 321, 352, 361
BLANK		6	158	**Reserved for future use**
BLANK		5	164	**Reserved for future use**
PUMA5	Public Use Microdata Area – 5% File	5	169	795
BLANK		5	174	**Reserved for future use**
GEOID	Geographic Identifier	40	179	All Summary Levels
NAME	Area Name	200	219	All Summary Levels
BLANK		50	419	**Reserved for future use**

Each state, the District of Columbia, Puerto Rico and the set of cross-state geographies, have one geography file associated with them, regardless of how the Summary File is accessed. Below is a screenshot of the beginning of the state geography file for Maryland. In the screenshot, the logical record numbers corresponding with the state of Maryland, Allegany County, and Anne Arundel County are circled. The logical record number for the state of Maryland is "0000001", for Allegany County it is "0000012", and for Anne Arundel County it is "0000013".

Excess spaces in the pictured geography file have been removed for illustrative purposes.

2.5 Estimate and Margin of Error Files

Each of the three Summary File directories include zipped files containing estimate files (file names beginning with an "e") and margins of error files (file names beginning with an "m"). The estimate files contain published ACS estimates and the margin of error files contain published ACS margins of error for their respective estimates. Here is the naming convention used for those files:

e 2009 5 ak 0001 000.txt

File Type
e=estimate

Reference Year
2009= (last year of the period)

Period Covered
5=5-year data

State Level
ak=Alaska

Sequence Number
0001=sequence number

000=Reserved for future use
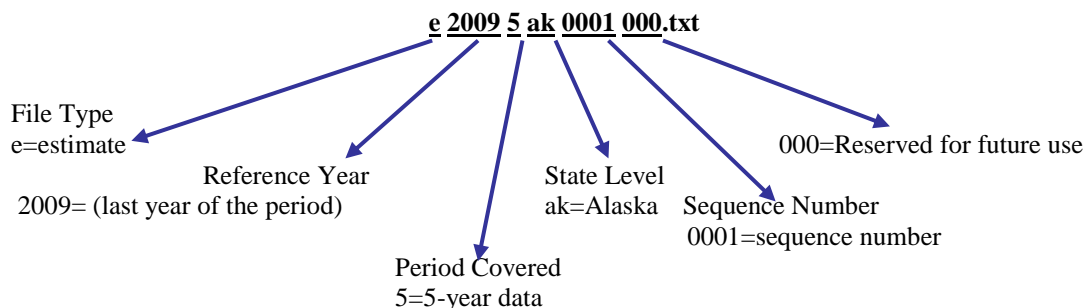

File Name: e20095ak0003000.txt		
Example	**Name**	**Range or Type**
e	File Type	e=estimate, m=margin of error, g=geography
2009	Reference Year	ACS data year (last year of the period for multiyear periods)
5	Period Covered	1=1-year, 3=3-year, 5=5-year
ak	State Level	US or abbreviations for state, District of Columbia and Puerto Rico
0003	Sequence Number	0001 to 9999
000	Reserved for future use	Iteration value for future use

The estimates and margins of error for Detailed Tables are grouped together in by sequence numbers, as discussed in Chapter 2.3. There is an estimate and margin of error file for each sequence number.

The format of the estimate and margin of error files are identical; they are strings of comma-delimited ASCII text. Each row represents a different geographic area and the first six fields contain metadata such as the geographic area and the sequence number. Following those fields are the estimates or margins of error for the Detailed Tables. Starting and ending positions of the fields associated with each Detailed Table can be found using the Sequence Number and Table Number Lookup file, which is discussed in Chapter 2.3. The estimates or margins of error for one Detailed Table span several fields within a row.
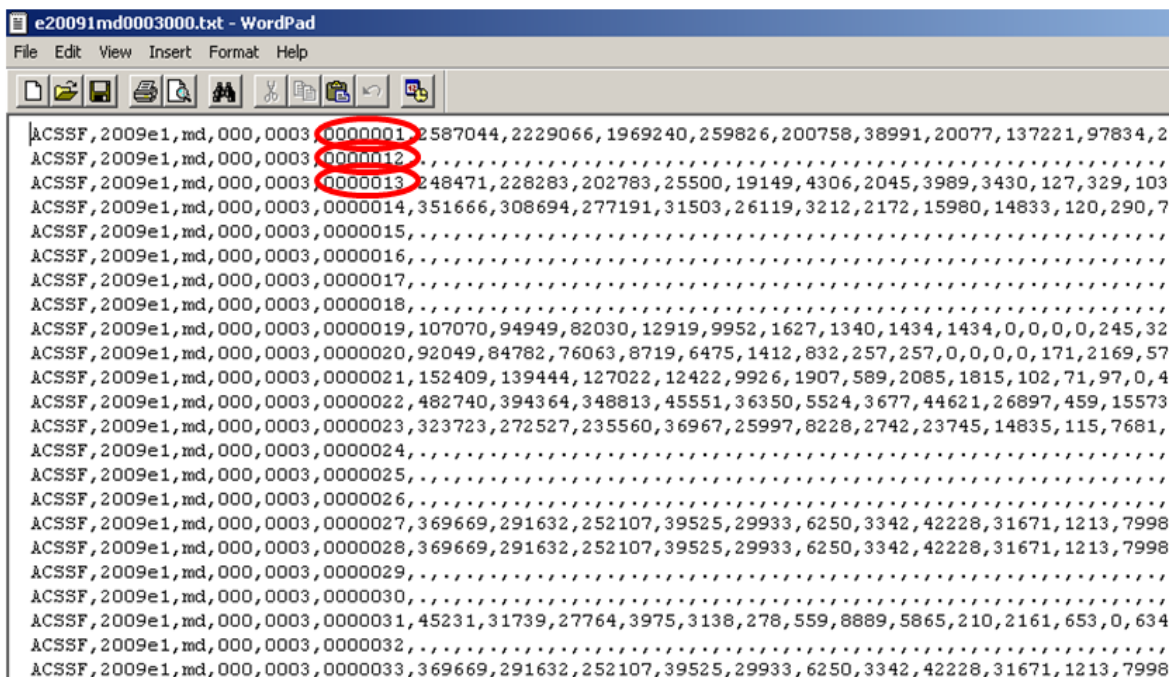

Here is the record layout of the estimates and the margin of error files:

Field Name	Description	Field Size
FILEID	File Identification	6 Characters
FILETYPE	File Type	6 Characters
STUSAB	State/U.S.-Abbreviation (USPS)	2 Characters
CHARITER	Character Iteration	3 Characters
SEQUENCE	Sequence Number	4 Characters
LOGRECNO	Logical Record Number	7 Characters
Field # 7 and up	Estimates	Various

Going back to the example from Chapter 2.3, we know that table B08406 corresponds to sequence "0003". Additionally, the Sequence Number and Table Number Lookup file (as shown earlier) tells us that table B08406 begins at position seven and contains 51 cells.

In order to get estimates for Maryland; Allegany County, MD; and Anne Arundel County, MD one must recall the logical record numbers associated with each geography. In Chapter 2.4, we identified these to be "0000001", "0000012", and "0000013", respectively. The logical record number, LOGRECNO, must be used to merge the geography information to the estimate and margin of error files.

The example below shows the estimate file for sequence "0003" and all geographies except census tracts and block groups for the state of Maryland. Note that each row has a uniquely assigned logical record number, called LOGRECNO, which links the estimate to a specific geographic area. The pictured example has the logical record numbers corresponding to Maryland, Allegany County, and Anne Arundel County circled. Estimates for table B08406 at these geographic levels can be found within their respective rows at field seven and continuing for 50 additional fields.

3   User Tools

3.1   Summary File Excel Retrieval Tool

For 2005-2009 ACS 5-year data, there are 295 Detailed Tables and all block group data not available on AFF. If only a few tables are needed, a useful tool is the Summary File Excel Retrieval Tool. If users have Excel 2007 or later, the tool is able to get tables from an entire sequence and from a summary level and component. Information on how to use Summary File Excel Retrieval Tool is located on the ACS Summary File page, at www.census.gov/acs/www/data_documentation/summary_file.

Hardware and Software requirements for the application include:
- Microsoft Windows XP Professional Service Pack 3 or newer (a Mac version is being developed)
- Winzip version 14.5 or compatible
- Office 2007 or newer
- DSL connection at 1.0 Mbps or greater is recommended

3.2   Summary File SAS Tool
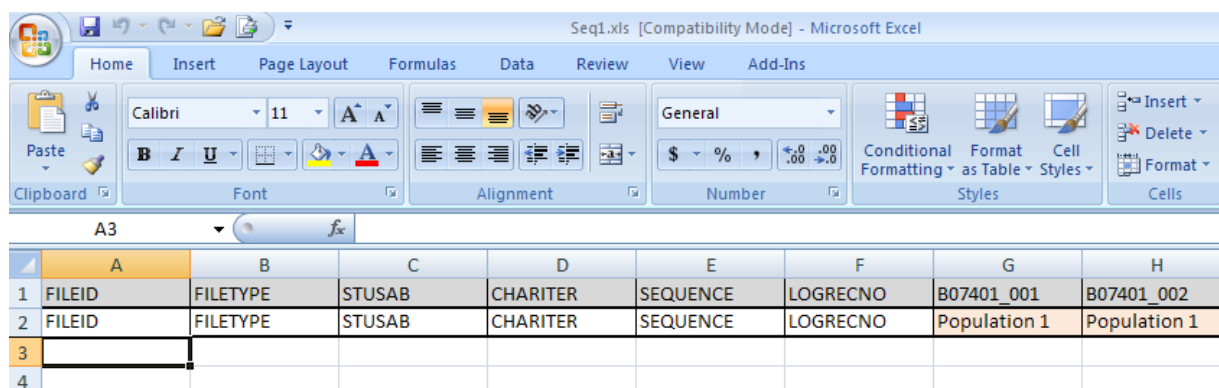

For users with SAS software, please visit the User Tools folder www2.census.gov/acs2009_5yr/summaryfile/UserTools/ to download SAS programs. These programs allow users to load the Summary File data into SAS Datasets. The SAS programs serve as a reference for the users, and include variable labels, however modifications may be necessary before users can get the data. After the needed Summary File data have been downloaded, users should specify the locations in the library references and the infile statements.

1) SF20095YR_SAS.zip − Contains SAS programs, which can be used to convert each estimate and margin of error into SAS Datasets. The SAS datasets include table stubs. There is one individual SAS program for each sequence per state.

2) SF_All_Macro.sas – This is a detailed example SAS program containing SAS macros which access the ACS Summary File geography, estimate and margin of error data. It creates one table for all geographies from the ACS Summary File.

3.3   Summary File Excel Import Tool
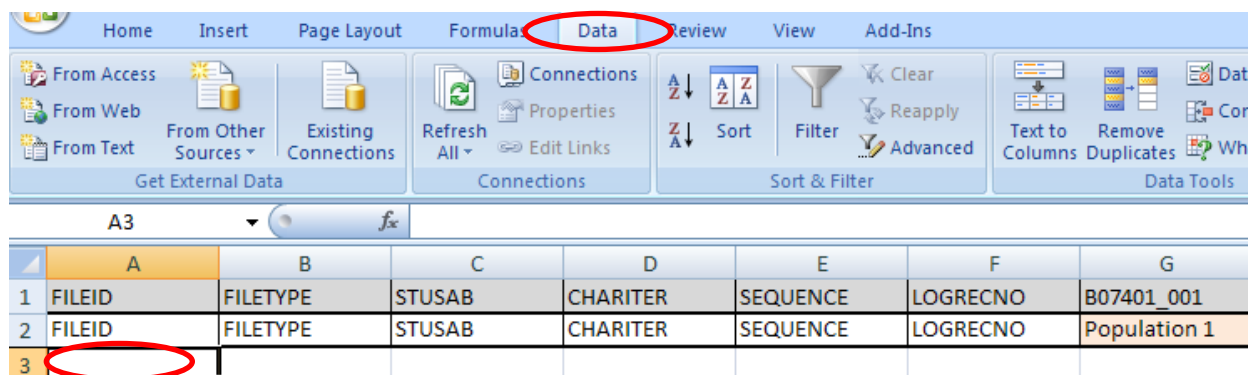

This tool requires that users first download the Summary File data and Excel Templates SummaryFileXLS.zip from www2.census.gov/acs2009_5yr/summaryfile/UserTools/. The zip file is a compressed file that contains individual Excel files and one geography file per Summary File Sequence. This tool is designed to be compatible with any version of Excel. Following are instructions on how to use this tool.

Open the appropriate Excel template for the Sequence ID you would like to import into Excel. The file will default to open on sheet "E". Both sheets "E" and "M" have the same information; one sheet is for "Estimates" and one sheet for "Margins of Error". When the file is open in Excel it should appear as below:
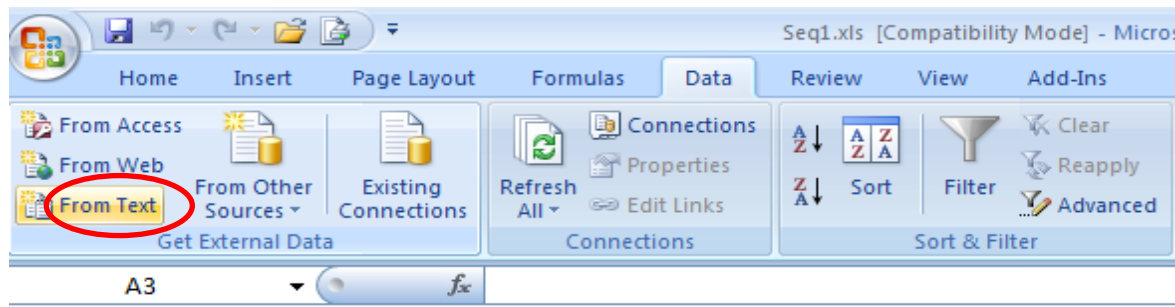

Place your cursor in cell **A3** and click on the **Data** tab in the Excel tool bar. See below:

To import the Summary File text file into Excel click on **From Text** in the **Get External Data** section of the tool bar.

Step 1 of the **Text Import Wizard** will appear. Under **Original data type** choose **Delimited**, and then click **Next**.
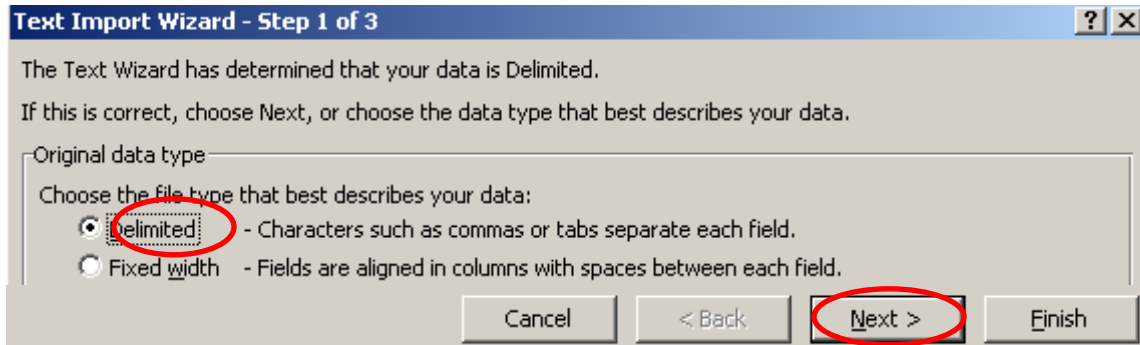

Step 2 of the **Excel Text Import Wizard** will appear. Under **Delimiters** choose **Comma**. Users may click **Finish** to import the file or choose **Next** to format the Excel columns.
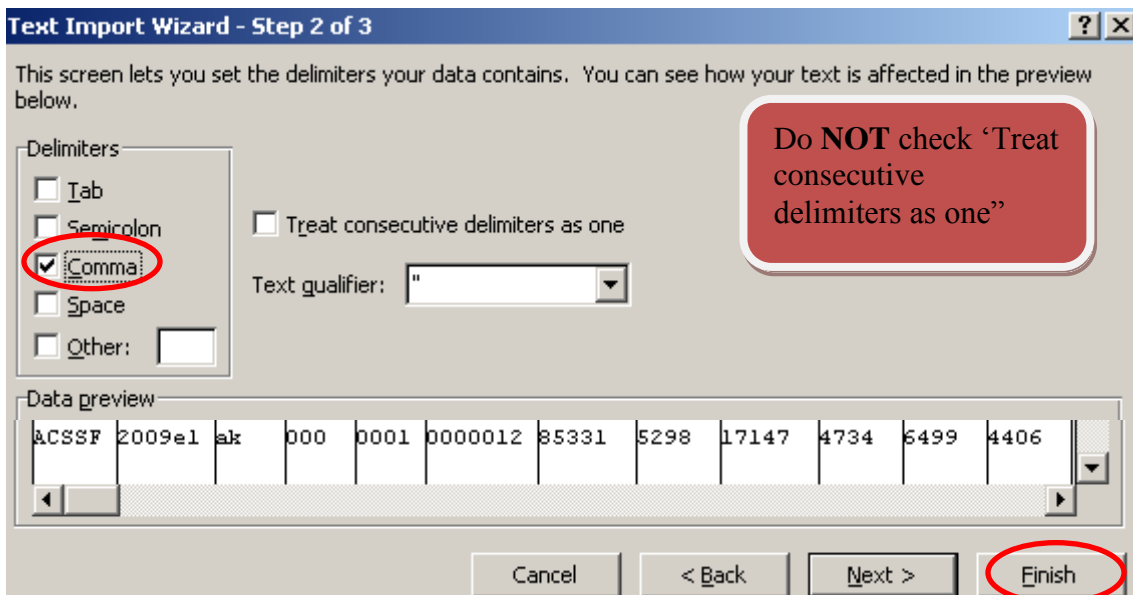

A Pop up window will appear to confirm cell **A3** as the correct cell. Click **OK**.
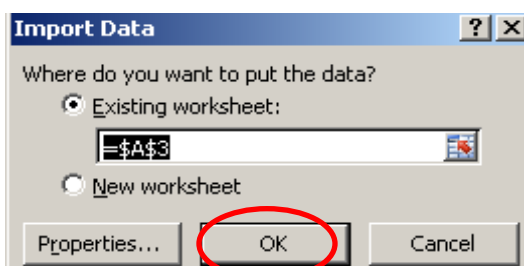

The summary file will be imported in Excel as below:

	G	H	I	J	K	L
1	B07401_001	B07401_002	B07401_003	B07401_004	B07401_005	B07401_006
2	Population 1 year and over in the United States	Population 1 year and over in the United States%1 to 4 years	Population 1 year and over in the United States%5 to 17 years	Population 1 year and over in the United States%18 and 19 years	Population 1 year and over in the United States%20 to 24 years	Population 1 year and over in the United States%25 to 29 years
3	711753	46387	132281	26759	58997	60325

Row 1 – Contains a unique identifier of Table ID and Line Number with a "_" between them
Row 2 – Contains the associated metadata for each unique Identifier
Row 3 – Is the first Row of the imported data

	A	B	C	D	E	F
1	FILEID	FILETYPE	STUSAB	CHARITER	SEQUENCE	LOGRECNO
2	FILEID	FILETYPE	STUSAB	CHARITER	SEQUENCE	LOGRECNO
3	ACSSF	20091	us	0	135	1

Column A – Is a constant value of "ACSSF" (stands for ACS Summary File)
Column B – Contains the associated metadata for each unique Identifier
Column C – Is the first Row of the imported data

4   User References

4.1   Detailed Tables for the 2005-2009 ACS 5-Year Estimates

It contains information on all detailed tables included in the 2005-2009 ACS 5-year Summary File. It also indicates which tables will be available at the block group level, and tables that will be available only on the Summary File (not available on American FactFinder). The table list is located in Appendix E.

4.2   2005-2009 ACS 5-Year Summary Levels/Components For Detailed Tables

It contains a list of the summary levels and components that are included in the 2005-2009 ACS 5-Year Detailed Tables. The list is located in Appendix F.

4.3   Sequence Number and Table Number Lookup

It contains information on the relationship between the sequences and the tables, and indicates the relationship between the sequences and the subject areas. The Sequence Number and Table Number Lookup is available in both Excel and SAS dataset format, and is located here: www2.census.gov/acs2009_5yr/summaryfile/.

4.4   Table Shells List

It contains Table ID, Line Number, Unique ID (table ID + Line Number) and stub. The table shells list is located on the following site: www2.census.gov/acs2009_5yr/summaryfile/.

4.5   Excel Geography Files

It contains logical record numbers (LOGRECNO), geography ID, and geographic labels by state. There are total of 53 spreadsheets in the folder: one for each state, the District of Columbia and Puerto Rico, and one for geographies that cross state boundaries. The mini geography file list is located on the following site: www2.census.gov/acs2009_5yr/summaryfile/UserTools/.

Appendix A: Supplemental Documentation

Supplemental documentation concerning the American Community Survey, to assist users using this technical document, is located on the ACS Website at: www.census.gov/acs/www/data_documentation/documentation_main/. Documents such as the Subject Definitions, Accuracy of the Data, and Code Lists are available on the URL listed above.

* The United States folder contains tables for summary levels that cross state boundaries, such as the nation, regions, divisions, metropolitan statistical areas and tribal reservations. It does not contain tables for geographies that are entirely within a state, such as counties and places; for those tables, go to the folder for that state.

Appendix C: User Notes

C.1   Jam Values

Some data values represent unique situations where either the information to be conveyed is an explanation for the absence of data, represented by a symbol in the data display, such as "(X)", or the information to be conveyed is an open-ended distribution, such as 115 or greater, represented by 115+.

The following special data values (and their meaning), can appear in the ACS Summary File table as an explanation for the absence of data:

- Missing Value =".""

   A dot "." indicates that the estimate is unavailable.   All ACS tables contain these values when estimates are missing due to no sample observations or too few sample observations .   It could also indicate that the estimate was removed due to Disclosure Review Board (DRB) requirements. In the margin of error files, this value could also indicate that the margin of error is unavailable for a median estimate that has been replaced with a jam value.

- Filtered Value or Geographic Restriction =" "

   A blank indicates that a value is not shown due to a geographic restriction. For example, there are some estimates that are not computed at all for certain geographies, such as tables that are not tabulated for the block group level.

- Margin of Error (MOE) = "0"

   A "0" entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate. This is similar to the "*****" symbol used in American FactFinder.

- Negative 1="-1"

   This indicates that an estimate does not contain a Margin of Error. Tables B00001, B00002, and tables starting with B98 and B99 do not have margin of error (MOE) associated with them. The MOE calculations are set to -1 for these tables.

- Medians

Below is a listing of the jam values for medians. For example, if there is an estimate of "2499" for table B10010, then it does not indicate a dollar amount. It means that the median is somewhere below 2,500 and thus isn't calculated.

Jam Value	Actual Meaning	Use for Medians
0	1 or less	Age, Duration of Marriage
9	9.0 or more	Rooms
10	10.0 or less	Gross Rent as Percentage of Income, Owner Costs as Percentage of Income
50	50.0 or more	Gross Rent as Percentage of Income, Owner Costs as Percentage of Income
99	100 or less	Rent, Gross Rent, Selected Monthly Owner Costs, Monthly Housing Costs
101	101 or more	Duration of Marriage
116	115 or more	Age
199	200 or less	Tax
1001	1,000 or more	Selected Monthly Owner Costs
1939	1939 or earlier	Year Built
1969	1969 or earlier	Year Moved In
2001	2,000 or more	Rent, Gross Rent
2005	2005 or later	Year Built, Year Moved In
2499	2,500 or less	Income, Earnings
4001	4,000 or more	Selected Monthly Owner Costs, Monthly Housing Costs
9999	10,000 or less	Value
10001	10,000 or more	Tax
200001	200,000 or more	Income
250001	250,000 or more	Income, Earnings
1000001	1,000,000 or more	Value

C.2 Rounding Rules, Margin of Errors (MOE)

1. B00001, B00002, B98001, and B98002 are sample counts, not estimates, and do not have margin of error (MOE) associated with them. Tables in series B99* imputation tables and B98* quality measure tables (except B98001 and B98002) do not provide margin of error calculations. The margin of error calculations are set to -1 for these tables.

2. There are a few special rules on how certain margin of error are determined for ACS estimates. The accuracy of the estimate (decimal place) within the detailed tables determines how many digits the margin of error is rounded.

The only exceptions to these rules are tables B19082 (Shares of aggregate household income by quintile) and B19083 (index of income inequality, commonly known as GINI). B19082 has

estimates rounded to one decimal place and MOE rounded to two decimal places. B19083 has estimates rounded to three decimal places and MOE rounded to four decimal places.

C.3 Display of Estimates

The estimates in the summary files are stored using standard notation instead of in scientific notation. The estimates are stored as whole numbers. The largest estimate in a Summary File contains 14 digits.

C.4 Sequences Used Only for United States Tables or Only for Puerto Rico Tables

There are 72 tables that differ between the United States (the 50 states and the District of Columbia) and Puerto Rico.   The tables are different because the comparable tables may they contain different metadata (such as C06001 having 45 cells and C06001PR having 37 cells). To identify what tables are available for Puerto Rico only look for the "PR" suffix in the table id (e.g. C06001PR). Because of that, there are sequence files that apply only to the 50 states and the District of Columbia or only to Puerto Rico:

US/State-only Sequences – Missing PR Data	PR Only Sequences – Missing US/State Data
1 (US)	108 (PR)
2 (US)	109 (PR)
17 (US)	110 (PR)
18 (US)	111 (PR)
20 (US)	112 (PR)
21 (US)	113 (PR)
22 (US)	114 (PR)
23 (US)	115 (PR)
24 (US)	116 (PR)
106 (US)	117 (PR)

Therefore, for sequences 108-117 for areas other than Puerto Rico, the sequence files exist, but they are blank.

C.5 Multiple Sequences For a Table

There are six tables with 499 cells. Due to the size restriction on the sequences (no more than 245 cells), each of the tables are broken down into three sequences. These tables are only produced at the United States national level (summary level 010), and the files for these sequences will be blank for all other summary levels. The table on the next page shows the tables that contain multiple sequences:

Tables That Are Contained in More Than One Sequence File

Table ID	Table Title	Sequences
B24121	Detailed Occupation By Median Earnings In The Past 12 Months For The Full-Time, Year-Round Civilian Employed Population 16 Years And Over	78, 79, 80
B24122	Detailed Occupation By Median Earnings In The Past 12 Months For The Full-Time, Year-Round Civilian Employed Male Population 16 Years And Over	81, 82, 83
B24123	Detailed Occupation For The Full-Time, Year Round Civilian Employed Population 16 Years And Over	84, 85, 86
B24124	Detailed Occupation For The Full-Time, Year Round Civilian Employed Male Population 16 Years And Over	87, 88, 89
B24125	Detailed Occupation For The Full-Time, Year Round Civilian Employed Male Population 16 Years And Over	90, 91, 92
B24126	Detailed Occupation For The Full-Time, Year Round Civilian Employed Female Population 16 Years And Over	93, 94, 95

Appendix D: Examples

D.1 Creating a Table

Let's say that you want to create Table B08406, "Sex of workers by means of transportation to work for workplace geography," for the state of Alaska. Which files do you need? How do you read the files?

You will need three files:
1) The Sequence_Number_and_Table_Number_Lookup.xls spreadsheet
2) The zip file 20095ak0003000.zip and the data file e20095ak0003000.txt
3) The geography file (g20095ak.txt)

Start with the Sequence_Number_and_Table_Number_Lookup.xls spreadsheet.   Under the "Tblid" column, look for the value "B08406". You will see that the "Sequence Number" is "0003." This means that the data you are looking for are in the data file "e20095ak0003000.txt". How do you know this is the right file? You know this from the name of the file: the "e" stands for estimate, 2009 is the year, 5 means that these are 5-year estimates, "ak" is the state (Alaska), and "0003" is the sequence number (which contains the data for Table B08406). See Chapter 2.5 for more information.

Then use the geography file for Alaska to determine the location within the state to which the data refer. The appropriate file is g20095ak.txt, where "g" means "geography", 2009 is the year, 5 is the period estimate (in this case, 5-year estimate), and "ak" is the state. (For each state, the geography file contains the lower-case FIPS State Code.)

When you open the data file, e20095ak0003000.txt, you will see the following comma-delimited fields on the first line:

ACSSF,2009e5,ak,000,0003,0000001,333404,266147,220739,45408,36112,…

The first six fields – from "ACSSF" to "0000001" – are identifiers:
A. The first field tells you that this is an ACS Summary File;
B. The second tells you that these data are five-year estimates for the year 2005-2009 (notice the "e" before "2009" and the "5" at the end);
C. The third tells you the state ("ak" is Alaska);
D. The fourth is an iteration number;
E. The fifth is the sequence number,
F. The last is a logical record code (LOGRECNO). The LOGRECNO identifies the geographic area within a state.

The geography file, g20095ak.txt, defines the LOGRECNO. Each LOGRECNO specifies a geographic area pertaining to the state. For example, a LOGRECNO of "0000001" means the state of Alaska; a LOGRECNO of "0000002" means just the urban areas in Alaska; a LOGRECNO of "0000003" refers to just rural areas in Alaska. Notice that each state has its own geography file. For more information, see Chapter 2.4.

The other fields in the data file, from the seventh on, are data values. Each field corresponds to the value of the "line number" variable in the data dictionary. So field number seven (the 333404 value, after the sixth comma) corresponds to line number one, which is "Total". Field number eight (the 266147 value, after the seventh comma) refers to line number two, which is "Car, Truck, or Van." Field number nine (the 220739 value) corresponds to line number three, which is "Drove alone." This continues all the way up to line number 51, at which point Table B08406 ends.

Were you to read this into a computer program using software such as SAS, you could translate the first nine fields of e20095ak0003000.txt as follows:

```
                           TABLE B08406:
         SEX OF WORKERS BY MEANS OF TRANSPORTATION TO WORK FOR WORKPLACE GEOGRAPHY

                                                            Car,
      FILEID     FILE                                       Truck,    Drove
                 TYPE     STUSAB    CHARITER   SEQUENCE LOGRECNO   Total   or Van    Alone

      ACSSF     2009e1    ak        000         0003    0000001  333404   266147   220739
      ACSSF     2009e1    ak        000         0003    0000013    2439      340      252

See a formatted example of Table B08406 below:

Table ID	Line Number	Sequence Number	Table Title	Estimates	Margin of Error
B08406		003	**SEX OF WORKERS BY MEANS OF TRANSPORTATION TO WORK FOR WORKPLACE GEOGRAPHY**		
B08406		003	Universe: Workers 16 years and over		
B08406	1	003	Total:	333,471	+/-2,630
B08406	2	003	Car, truck, or van:	266,201	+/-2,589
B08406	3	003	Drove alone	220,762	+/-2,439
B08406	4	003	Carpooled:	45,439	+/-1,795
B08406	5	003	In 2-person carpool	36,132	+/-1,596
B08406	6	003	In 3-person carpool	5,602	+/-510
B08406	7	003	In 4-or-more-person carpool	3,705	+/-532

D.2   Creating a Table Using SAS

Here is an example of how to access the Summary Files for one table for all geographies from the ACS summary file.

Question: I am interested in downloading table B01001 for all published ACS geographies, how would I do this?

1) Go to the Sequence Number and Detailed Table Number Lookup File (Chapter 2.3) to locate sequence number for table B01001. There are Excel and SAS dataset versions of the file. They are available at www2.census.gov/acs2009_5yr/summaryfile

2) Use   the   Summary   File   SAS   Example   Macros   located   at www2.census.gov/acs2009_5yr/summaryfile/UserTools/. Run the macro:

%***TableShell***(B01001)***;***

This macro will provide metadata information on a given table, in this case B01001.

3) The following SAS dataset will be created with information about table B01001:

Table ID	Sequence Number	Line Number	Start Position	Total Cells in Table	Total Cells in Sequence	Table Title
B01001	0013		7	49 CELLS		SEX BY AGE
B01001	0013					Universe: Total population
B01001	0013	1				Total:
B01001	0013	2				Male:
B01001	0013	3				Under 5 years
B01001	0013	47				75 to 79 years
B01001	0013	48				80 to 84 years
B01001	0013	49				85 years and over

We can see that table B01001 is located in Sequence 0013; this applies to all published geographies.

4) We can read into SAS all tables in the 0013 sequence by running the SAS Example Macros:

   %***CallSt***;

This macro will run a do loop creating State two-digit abbreviations, which will allow a simple way to read the Summary Files into SAS for all geographies. Each time a valid two digit state abbreviation is created, the macro %***AllSeqs*** is run with the two digit state abbreviation.

The %***AllSeqs*** Macro performs the following tasks:

A. Read the geographic header file - %***AnyGeo*** `Macro.`
B. There is a do loop to allow you to choose which sequences you would like to read in for example if you wanted sequence 0010 set the loop to be `do x=`**`13`** `%to` **`13;`** - The 0 values will be filled in.
C. Within the do loop the following macros will be executed:

    a. `%`***TablesBySeq***`;` -- This will give information about the whole 0003 sequence, not just table B01001.

    b. `%`***ReadDataFile*** – This macro is called two times once for each type of estimate. This macro will generate and run SAS code for each sequence specified in the do loop in step 2 and for each geography specified in the ***%CallSt*** `macro.`

    c. Lastly, there is a merge statement that will merge together each of the three types of estimates and the geography header file by sequence number per geography.

5) You now will have all tables in the 0013 sequence read into SAS in the following dataset names, if the code is not modified, in the work directory Sf0013<st two-digit abbrev>.sas7bdat.

Appendix E: Detailed Tables for the 2005-2009 ACS 5-Year Estimates
